

# NEW! Secure Outdoor Areas

## Features of the secure roller shutters include:

- Manufactured from corrosion-resistant steel with reinforced guide rails.
- Fitted with compact roller-box housing, which minimises visual impact.
- An effective locking system which distinguishes this security system.
- BS or RAL colour-matched for aesthetic appeal – the shutters can be made the same colour as the canopy or to any RAL or BS colour.
- The shutters can be operated manually (depending on size) or electrically, with control devices such as a rocker switch, and remote control. They can also be easily tied in with existing alarm and access control systems should this be required.

Choose from:

• **The Coniston Wall Mounted Canopy:** a 40mm 'X' structure polycarbonate & aluminium system.

• **The Ullswater Free Standing Canopy:** a 35mm polycarbonate & steel APEX structure.

• **The Welford Dome:** a free standing domed canopy with 5mm polycarbonate & steel posts.

• **The Derwent Pagoda:** a 32mm polycarbonate & steel structure.

• **The Codale Conic and the Eton Pyramid:** tensile fabric structure with steel posts.

All our structures can be powder coated to any RAL colour and are fitted and installed by one of our trained teams of fitters

*The Ullswater free standing canopy with secure roller shutters*

*Installation at Buffer Bears Nursery, Lancashire*

*The Codale Conic tensile fabric structure with secure roller shutters.*

*Installation at Methodist Junior & Infant School, West Yorkshire*
